

## MERN Stack Developer @ Simform Slotions

A **developer** with the understanding of modern technologies and best design practices

## Experience

### Simform Solutions, MERN Developer

Dec 2021 - present

I am a MERN Full stack developer who is responsible for writing reusable, testable, and efficient code. We design and implement low-latency, high-availability, and performant applications also have to Implement security and data protection with understanding of performance testing and optimization techniques.

### Yaartist, UI/UX Intern

Nov 2020 - Dec 2020

As a UI/UX Developer, I collaborated with Yaartist's core team to design visuals and user interfaces for their website. Illustrator, Photoshop, and Figma were among the tools I used.

## Top Projects

### CanMan -Candidate Manager

[Demo](#) | [Code](#)

A candidate management application built with ReactJS on the frontend, MaterialUI and Bootstrap for styling, Node and Express on the backend, and MongoDB as the database.

### ChatOp -Chat Application

[Demo](#) | [Code](#)

It's a real-time chat application that allows users to communicate anonymously with one another. Node, Express, Socket.io, Pure JavaScript, CSS3, and HTML5 are among the technologies used.

### TaskManager API

[Demo](#) | [Code](#)

A Task-Manager API that helps to manage tasks with authentication and authorisation. User Profile Upload utilising multer, Express Routes (RESTful API Endpoints), Middlewares for authentication (JWT), database integration MongoDB and Mongoose(ORM), email functionality using NodeMailer, routes testing in postman, unit testing in Jest, and API documentation in swagger.

## Education

Dharmsinh Desai University

B.Tech -Computer Engineering

CGPA: 8.15

Shree Gyanmanjari Vidhyapith

12th Science Stream

HSC: 88.30 (Percentage)

## Tools / Tech.

### LANGUAGE

JavaScript | TypeScript | Python

HTML5 | CSS3

### FRAMEWORK

Node | Express | NestJS | ReactJS

### DATABASE

MongoDB | MySQL | PostgreSQL

Firebase | Redis

### SERVICES

MicroServices | RESTful

GraphQL | Serverless | NPM

Socket | Payment Gateway

### ADV. TOOLS

Git | Docker | Heroku | AWS

Lambda | Elastic Search

### Design/UI

Figma | Illustrator
